

Corporate Registers Forum

Report on the CRF to the IACA Community

What is it?

The Corporate Registers Forum (CRF) is an international not for profit organisation for administrators of corporate registers.

Our aim is to provide delegates with the opportunity to review the latest developments in corporate business registers internationally and exchange experiences and information on the present and future operation of corporate business registration systems.

Objects

To promote liaison, co-operation and discussion among Members' jurisdictions/countries.

To exchange or facilitate the exchange of information on the registry systems of Members' jurisdictions/countries, their roles and responsibilities, and issues relevant to their activities, including operational and management practices and procedures, technologies used or proposed and responses to changing registration trends.

To identify issues and problems that are seen to impede the efficient and effective management of registries, particularly any cross-border issues.

To liaise with other international registry management organisations and constituencies on common registry management issues.
