**Q56** Provide the top 3 highlights during the period ending (challenges, accomplishments, developments)

Multi-Jurisdictional Registry Access Service (MRAS) to connect Canada's Business Registries

In March 2017, we completed the prototype for MRAS. Using sample data sets from eight jurisdictions, the prototype successfully demonstrated the ability to share data among the different jurisdictions. Based on the success of that work, we immediately started work on the pilot. Throughout 2017, we held conference calls every two weeks with participating jurisdictions as well as an in-person tech jam with technical representatives in order to gather and confirm the technical requirements.

IT Modernization Renewal

Corporations Canada continued advancing its IT modernization initiative by identifying and exploring the implementation of new and innovative technologies for client services and increasing our capacity to offer online services to clients. CC released the ability for clients to self-serve copies online for CBCA and NFP. For the vast majority of the copies, these will be provided within minutes without any human intervention. Not-For-Profit (NFP) amendments were also released online.

Launch of Client Relationship Management (CRM) system

Corporations Canada launched a client relation management (CRM) system to gain insight into the behaviour of clients in order to strategically serve those clients. CRM permits Corporations Canada to record and manage client interactions and provide business intelligence. Extraction of business intelligence allows Corporations Canada to better identify client needs and improve products and services accordingly. The CRM provides evidence that will be used to support Corporations Canada's business planning.

**Q57** Provide a top priority for your office in the next 12 months.

Multi-Jurisdictional Registry Access Service (MRAS) to connect Canada's Business Registries  
Corporations Canada will continue working with the provinces and territories to connect Canada's business registries. MRAS is a service that will create interoperability among the fourteen Canadian business registries to offer, for the first time and on a real time basis, searches of businesses across multiple registries; data exchanges between registries to streamline extra-provincial registration; and notifications of changes between registries to ensure data integrity. The project is now in the pilot phase. Corporations Canada and four provinces (British Columbia, Saskatchewan, Ontario and Quebec) are part of the initial phase of the pilot, which is expected to be completed by March 2018. Alberta and Manitoba expect to onboard in the second phase. The pilot will inform the requirements for the implementation of a fully operational version of MRAS.

IT Modernization Renewal

Continue advancing our IT modernization initiative by identifying and exploring the implementation of new and innovative technologies for client services and increasing our capacity to offer online services to clients, such as exemptions. As well, in an effort to modernize our Call Centre, Corporations Canada will add a Chat service for our clients.
