

DELBERT HOSEMANN
Secretary of State

Jurisdictional Presentation
May 21st 2015
New Online Business Filing System

System Goals

Reduce and ultimately eliminate paper filing

Make process easy enough that anyone can file

Allow ALL Business filings to be filed Online

Reduce Processing / Turn around time (no back logs)

Reduce Rejections

Improve Customer Service

Our Approach

Task centric not Form Centric

Authenticated User Accounts

Users can file for Multiple Entities

Automated Electronic Notifications

All filings must be created online

Upfront Validations with Appropriate Warnings and Errors

All filings can be paid electronically online (e-Check, Credit Card, ACH) or Printed and Mailed in

Electronically generate documents to eliminate scanning (where possible)

User Experience

Establish a User Account (must have a valid email)

Login

Create New Filings

Order Certified Documents or Certificates

Manage Filings through Online Queues

Filing Tasks

Using the Online System

Required fields are designated with a **red ***

Blocks of instruction and information dynamically displayed as appropriate

A company's existing information pre-populates and may be edited as needed

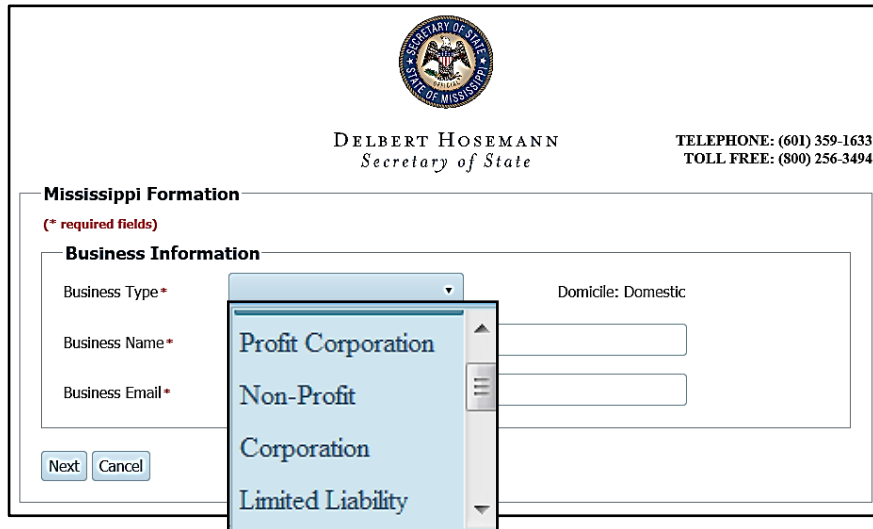

System and field validations show the customer missing data fields, incorrect information, required signatures, and other errors/items that must be corrected prior to submission

System warnings are also provided to inform the customer of potential issues with the filing that require review by the Filing Office prior to approval

Attachments may be added prior to submission

Titles provided for the signatures are only those authorized for that specific business type

Tangible Results

99% Online filings, over 60,000 user accounts created

Most filings are approved automatically, and the customer receives an e-mail with the filed document within 60 seconds.

Reduction of the rate of rejection from approximately 25% of all filings to less than one half of 1%.

Filings requiring review, are usually completed within an hour of submission

Rejected (Returned) Filings are often corrected, resubmitted and approved within a matter of hours.

Staff is not bombarded with handling paper and can focus on more difficult filings, answering phones and cross training in other areas.

There is no backlog of filings requiring temporary staffing.

The training time of new staff is significantly reduced because of the system validations built into the software.

Technical Notes

System developed using Microsoft.NET and SQL Server

Utilizes Xml to store Company Profiles and Filings

XML is based off Business Annual Report XML Schema used by other IACA members. Extended as needed.

Documents and Certificates are Generated using XSLT

Utilizes the NIC payment gateway utilized by many IACA members
