

**Kateri Gill:**

Kateri Gill is the Program Manager for the Elections Infrastructure Information Sharing and Analysis Center (EI-ISAC), a program area of the Center for Internet Security (CIS). She graduated from the State University of New York with degrees in Geology and Physics, and worked in the field of Semiconductor Engineering prior to joining the ISAC team in 2016.

Kateri began her career at CIS by working with representatives from across our nation's State, Local, Territorial, and Tribal governments spreading awareness of the ISAC's cybersecurity resources and services, and also co-chairing the Business Resiliency Workgroup.

In 2018, Kateri shifted her focus and became an integral player in the initial pilot and launch of the EI-ISAC. She now champions ensuring that elections organizations have access to the resources they need to improve their comprehensive cybersecurity posture.
