Senior Vice President, Identity Services - RapidLEI

Tasked to accelerate the Global Identity Strategy of the Ubisecure brand from the traditional Nordic home ground to a global audience through investment, partnership and collaboration. Successfully engineering a highly efficient, and therefore disruptive, automation workflow process for the LEI (Legal Entity Identifier) product line for Ubisecure Oy. Operational for less than a year as an LEI Issuer, RapidLEI regularly appears in the top 3 position for LEI issuers for 'new' LEIs added to the GLEIS (Global Legal Entity Identifier System).
